

RX INVERTER

Customised to your machine

» High motor-control performance

» Built-in know-how functionality

» Uncompromising Omron quality

High performance to match your application

Omron realises that you need quality and reliability, plus the ability to easily and quickly customise your inverter to the application in hand. And with the RX, you have the perfect tool for the job.

Naturally it combines the same high level of quality and performance for which Omron is renowned. It also has abundant application functionality on board and you can customise it yourself to match your precise requirements.

Key features include:

- Up to 132 kW
- Built-in EMC filter
- Sensor-less and vector closed-loop control
- High starting torque in open loop (200% at 0.3 Hz)
- Full torque at 0 Hz in closed loop
- Built-in logic programmability
- Built-in application functionality
- Automatic energy saving
- Micro-surge voltage suppression
- Built-in Modbus RS485 (options for other networks)

Customise your inverter

CX-Drive enables you to make your own programs to suit your machine, e.g. for an unwinding application.

Positioning functionality

Simple positioning is handled by the inverter itself without the need for an external motion controller. Functions include pulse trace position control mode, homing and position teaching.

Focused on application

The inverter is pre-programmed with special application functionality, e.g. brake control, by-pass motor control, orientation stop, interruption filling and switching from speed to positioning control, etc.

From high torque to high motor efficiency...

Reliability with environmental responsibility

Omron is renowned for the reliability of its products. Moreover, Omron's policy is to offer environmentally safe products free from any banned substances.

Sensor-less vector control at 0 Hz domain

With the benefit of patented 0 Hz domain open-loop control mode, the RX can develop 150% torque at 0 Hz allowing zero speed load holding. Moreover, an improved sensor-less vector control algorithm enables the RX to develop more than 200% starting torque at 0.3 Hz.

Cost and space saving filter

The RX has a built-in EMC filter that saves on cost and space compared with the standard external filter solution.

3 ph : EN61800-3 cat. C2

Long life design

RX has been designed with high quality components to guarantee a long operation life and minimise downtime. It includes a versatile maintenance function that warns the user in the event of DC bus capacitor temperature rise or cooling speed reduction.
